# DWTS Sampling Support Services

ALS Environmental can offer potable water sampling accredited to ISO17025 and DWTS standard. This will be used alongside the DWTS approved laboratory analysis at our dedicated Drinking Water testing Facility in Wakefield.

ALS Environmental also offer a further portfolio of sampling that is UKAS ISO 17025 for Legionella, Waste water, Surface water and Trade effluent.

Our range of environmental monitoring and testing services are designed to help support local authorities in meeting their legislative requirements and to comply with environmental and DWI regulations.

Our experienced field technicians are multi-disciplined and have fully equipped temperature controlled and monitored vehicles. ALS couple this with a nationwide coverage, allowing us to provide an efficient response to our client's needs.

We provide a tailored independent, one-stop DWTS sampling and analytical service.

For further detail, or to book a sampling event please contact our Commercial Sampling Project Manager, Hannah Hall:
